The University Libraries support Ball State’s mission of teaching, scholarship, and public service through the libraries’ collections of rich informational materials and services of its professional staff. The goal for the libraries is to provide programs, services, and collections that support student pursuits for academic success and faculty endeavors for knowledge creation and classroom instruction.

Through the Alexander M. Bracken Library (the main library) and its two branch libraries of Architecture and Science-Health Science, the libraries offer convenient access to an expanding collection of digital and print academic resources that number over 1.5 million volumes and included books, periodicals, microforms, audio-visual media, government publications, maps, manuscripts, music scores, archival records, and other information sources.

- Description
- Format
- Keyword
- Publisher
- Title
- Source
- Subject

The subjects covered by the DMR include:
- Architecture
- Literature
- Education
- Science
- History
- Communications
- Fine Art
- Source
- Subject

The DMR includes several special features:
- Zoomify Technology for viewing large documents such as maps.
- Printing capabilities for Zoomified images.
- Interactive Google Maps to show historical sites in reference to today’s road network.
- Embedded multimedia players allow users to listen to or view original film and audio while reading the transcript on the same screen.
- Full text search capability for newspapers, letters, journals, and other texts.

The Ball State University Libraries offer the Digital Media Repository as a free resource available to the public at any time.

For more information or to schedule a demonstration, contact John B. Straw, Assistant Dean for Digital Initiatives and Special Collections at JStraw@bsu.edu or (765) 285-5078.
