ABSTRACT

CREATIVE PROJECT: Rehabilitation Plan for the Spurgeon House

STUDENT: Emily Husted

DEGREE: Master of Science

COLLEGE: Architecture and Planning

DATE: May, 2012

PAGES:

This rehabilitation plan has provided appropriate guidance toward the rehabilitation of the Spurgeon House, an endangered local landmark in Muncie, Indiana. Thorough documentation and research was conducted on the building. The plan presented an overview of the historic background and significance of the Spurgeon House, as well as an architectural description, comprehensive condition assessment, recommendations for rehabilitation, proposed alterations, and detailed cost estimate. Accompanied with the report are photographs and architectural drawings. The recommendations provided follow the guidelines provided by the Secretary of the Interior’s Standards for Rehabilitation. In addition, a grant proposal and certificate of appropriateness materials and documents were included to assist with the rehabilitation process.
