Notice, if you may, that I didn't say "epic." While I may share its recent use's sentiment when applied to the concept of wordage, I feel that "epic" in particular has become a bit bastardized through over-use. Previous words to go the same way include adjectives like "awesome," "sweet," and the 1940s iconic "tight." I prefer to switch it up, sometimes resurrecting older and more dormantly-used terms like "neat," "nifty," or even the occasional "swell." Words are great, but can lose their impact - their punch - or finesse when conveying emotion or thought.
