OBSTETRIC & GYNECOLOGY CLINIC

The branch of medicine that deals with pregnancy, labor and the puerperium and the branch of the medical science dealing with diseases of women, particularly those affecting the sex organs.

This clinic will provide:

1. Comprehensive outpatient obstetrical care including appointment, walk-in and emergency visits to a doctor and appointment and walk-in visits to the OB-GYN clinical nurse.

2. Comprehensive outpatient gynecological care including appointment, doctor referral, walk-in and emergency visits to a doctor and appointment and walk-in visits to an OB-GYN clinical nurse.

3. Patient and family education in obstetrics, gynecology and reproductive biology by doctors and OB-GYN clinical nurses.

DECISIONS

1. Obstetrical and gynecology patients will be scheduled and seen in separate clinic modules.

OTORHINOLOGY CLINIC

A branch of medicine that deals with the ear, nose, and throat.

This clinic will provide:

1. Comprehensive outpatient otolaryngology care including appointment and doctor referral visits to a doctor for adult patients.

2. Comprehensive outpatient audiology and speech pathology care including appointment and doctor referral visits to an audiologist or speech pathologist for adult patients.

DECISIONS

1. In the Audiology and Speech Pathology Clinic, the control of sound is of prime importance. In a clinic concerned with communications and the problems of communication, an absolute essential is the adequate control of sound. First, unwanted sound or noise of sufficient intensity to disturb, distract, or mask the hearing of wanted sounds either must be eliminated at the source or adequate noise and/or vibration isolation of the provided. A few of the common noise producing mechanisms, the location of which must be carefully considered in view of the interfering noise they can provide are: elevators, air handling and conditioning units, compressors, flush toilet, waste lines, steam lines. Second, the wanted sound must be controlled by appropriate sound absorptive treatment of the various areas so that they can be understood and/or measured easily and not be confounded by an excessive reverberation time of the space. Different operations carried out in this type clinic require different degrees of sound control and should be located accordingly.

PULMONARY DISEASE CLINIC

The branch of medicine that deals with the lungs.

This clinic will provide:

1. Comprehensive outpatient pulmonary disease care including appointment, doctor referral and walk-in visits to a doctor, to a doctor's assistant, to a social worker.

2. A central diagnostic and treatment referral center for tuberculosis and nontuberculosis chest disease patients.

3. Outpatient respiratory therapy treatment and instructions for patients.

DECISIONS

1. The Pulmonary Clinic is to be located near the Radiology Clinic since almost all pulmonary disease patients have a standing order for an x-ray before each doctor visit. The doctor does not usually see the patient until the x-ray films are available. Exception to this is made in the case when the patient is obviously quite ill or when the patient may not require an x-ray as determined on a prior visit.

ORTHOPEDIC CLINIC

The branch of surgery concerned with corrective treatment of musculoskeletal deformities, disease, and ailments by manual and instrumental measures.

This clinic will provide:

1. Comprehensive outpatient orthopedic care including appointment and doctor referral, walk-in visits to a doctor and to an orthopedic assistant for adult and pediatric patients.

DECISIONS

1. There is to be adequate storage provided in the nursing unit for storage of traction and other orthopedic equipment.

2. A gait observation and motion testing area containing a 20 foot observation lane, a set of steps and a set of parallel bars and full length mirrors will be required.

3. The doorways in the waiting room, cast room and corridors leading to Radiology must be adequate to allow easy movement of wheelchairs. The patient toilets must be designed to accommodate patients in wheelchairs and physically disabled patients who require assistance.

4. The cast rooms should have a built-in vacuum cleaning system outlets. The exhaust air from the cast rooms should be filtered.

5. The ceiling over each cast table should have provisions for the use of overhead traction equipment.

# SUMMARY

## CLINICAL FACILITIES
- Family Care: 10,064 sq. ft.
- Specialty: 23,149 sq. ft.
- Dental: 4,309 sq. ft.
- Support Service: 5,000 sq. ft.

## ADJUNCT FACILITIES
- Laboratory: 1,600 sq. ft.
- Radiology: 2,679 sq. ft.
- Pharmacy: 1,100 sq. ft.

## PUBLIC FACILITIES
- Lobby: 10,000 sq. ft.
- Patient Records: 300 sq. ft.
- Waiting: 16,320 sq. ft.
- Public Toilets: 16,000 sq. ft.
- Child Playroom: 16,000 sq. ft.

## ADMINISTRATION
- Offices: 320 sq. ft.
- Staff: 640 sq. ft.

## SUPPORTING FUNCTION
- Mechanical: 10,080 sq. ft.
SITE

- Humanize parking
- Approach-covered entry - scale elements on facade (size of trees), exterior plaza
- Landscaping - organize, group trees, define exterior spaces

PLANS

- Segment atrium with vertical circulation
- Intensify activity within atrium
- Redefine typical waiting area
- Day care - indoor/outdoor relationship
- More clear use of vending area
- Look at roof uses on West
BUSINESS/ADMITTING
