Abstract

Students are usually quite intimidated by poetry. Yet they are very comfortable with popular music. My project is a unit which incorporates both music and classical poetry. By showing that music is only poetry set to a melody, I have created a unit that conveys the value of poetry while introducing students to classical poetry in a non-threatening manner. Through careful examination of the elements of poetry and listening to both recordings of poetry set to music and reading poetry, students will learn that poetry is not as frightening as it may initially seem. They will also learn to write their own poetry. In addition, I have also included my own works of poetry which have been set to music as part of the unit for examples of poetry written by someone my students will know personally.
Acknowledgements

- I want to thank Dr. Laurie Lindberg for advising me though this project. As my professor since freshman year, she has supported and inspired me to pursue my interests in English. Her guidance has been incredibly helpful.

- I would also like to thank Mrs. Karen Storie, my sixth grade supervising teacher for allowing me to try elements of my project on her class during my student teaching.

- In addition, I need to thank Dr. Joyce Huff for providing me with a bit of inspiration to start this project. At the time of the class, I never knew how it would impact my life.

- Finally, I must thank my fiancé, Bryan McDaniel. Without his assistance, my computer would be in pieces in the parking lot after “jumping” from my window. I appreciate your help and support.
When I began studying at Ball State University, I majored in Music Education. I had studied piano and music for the past fifteen years. It seemed the logical path. I loved to play the piano, as well as give piano lessons. I enjoyed music and the stories that it told. I began writing my own songs in high school. I even wrote my graduating class’s graduation song. Studying music in college seemed logical.

I really did enjoy Music Education. I was able to learn a great deal about styles I had not previously played and how to teach children to sing like nightingales. I even initially began my thesis project, a compilation CD of my original music. However, midway through my Junior year, I discovered that I did not want to teach music for the rest of my life. I knew that I had to change my major. Yet, I did not know what I wanted to study.

I began to analyze the things that I enjoyed about music and other areas of my life. I began to realize how much I loved reading and writing. Surprisingly, it was all connected to my music, as well. I loved music for the way it made me feel and the stories that it told. I loved to write music because I could further express the emotion of my words through the melody of a song. My music was lyrically led. That was when I switched to English Education. I have never been happier to make a change in my life.

As I began my new area of study, I again thought of my thesis project. To me, it seemed sensible to continue my original project. After all, the tracks that I had recorded were based on lyrics that I had written. However, as time passed, I developed new ideas. I wanted a way to connect my musical life to my future life as an English teacher.
great deal of thinking and planning, I decided to try something that even made me a little bit nervous. I would create a unit plan on poetry.

Through my years of study and my student teaching experience, I have discovered that students—and many adults—are deathly afraid of poetry. Students view it as a foreign language that is unapproachable. I know that I need to teach poetry in my classes for the rest of my teaching career. However, I would enjoy it much more if my students were not terrified of the topic.

So I chose for my Senior Project to be a unit plan which incorporates both areas of my life (music and English). Students are often intimidated by poetry. However, they enjoy music. By demonstrating that music is only poetry set to a melody, I have created a unit that presents the value of poetry while introducing students to classical poetry in a non-threatening manor.

The unit begins by asking students to describe their favorite lyric. Then, this unit asks that the teacher play poetry that has been set to music (Tennyson, Marlowe, etc.). Students can read poetry by the same poets. Students will gain knowledge of poetry while learning that they are already quite familiar with it. Finally, students will be able to create and share their own poetry. To reduce the students' fear of creating poetry, I have also included my CD for the students to hear what I have written.

I feel confident that the unit that I have prepared is practical and will help students feel less intimidated by poetry. In fact, I know it works. Through my student teaching experience, I was able to teach some of my plan, in a simplified version, to my class of sixth graders at West Jay Middle School. By working with the sixth graders, I was able
to assess many of the misconceptions that most students hold about poetry. These same misconceptions are the very things that cause them to have fear.

Before being able to complete much actual planning, I had to decide what grade I felt would be best served by my poetry unit. Although I enjoyed trying a simplified version with my sixth grade students, I wanted to aim for a grade that could easily converse about the topics raised in the poems. Twelve year olds are not ready to discuss some of life’s biggest moral issues or passionate love. However, twelfth graders are expected to face the realities of the world and make moral decisions every day. As a result, I decided to write the unit for twelfth graders.

When planning my unit, I tried to keep my students’ misconceptions in mind. For example, my sixth grade students debated whether a poem could tell a story. Some were insistent that it could but had no examples to back their claims. Others insisted that a poem was just about emotion and disconnected thoughts. Realizing that students are often comfortable with stories, I decided to start the unit with poems that resolved their debate. I selected the pop song “Johnny B. Goode” to read because it tells a story. Also, the song is old enough that most of the students I will teach will not be familiar enough with it to recognize it while reading. Then, after establishing, through several examples, that a story can exist in a poem, the unit asks for students to examine “The Lady of Shalott” by Tennyson.

Each of the poems that I selected has a specific purpose. Early in the unit, I planned to read “One Fish, Two Fish, Red Fish, Blue Fish” by Dr. Seuss for two reasons: to establish the importance of rhythm without having to concentrate on comprehension, and simply to lighten the mood about poetry. I wanted to include examples of poetry
used in popular culture in a way that students could easily relate to, which led me to video. *Vanity Fair* is a very recent movie, based on an excellent book that could also be read by Seniors, which contains poetry examples from both Byron and Tennyson.

Also, when selecting poems, I included only poems for which I could find appropriate sound recordings. Admittedly, this limited my choices tremendously. Most poems are not set to music. The ones that are recorded often have an operatic style that students reject at the first pitch. I tried to select choices that students would willingly listen to, even if they may not love the style of the song.

There were several reasons that I wanted to have sound recordings of the poems. Obviously, poetry set to song bridges the gap between popular music and poetry. The music also helps make students more comfortable. In addition, from an educational standpoint, having both aural and visual instruction heightens that chances that information will be retained. Also, students usually have a difficult time grasping rhythm and language in poetry. Listening to a recording can make this process easier, especially for students who do not read well or who have learning disabilities.

Students are often intimidated by poetry. I intend to put their fears to rest. This unit demonstrates that popular music is only poetry set to a melody. Students will learn the value of poetry by realizing that they are already familiar with it in everyday life. I am very satisfied with the unit plan that I have designed. Not only do I know that I have put a lot of time and effort into this project, but I know that it will work in the classroom.
