**Concept Statement**

The Hampton Inn & Suites Redesign will focus on creating a multi-functional space. Similar to a cruise ship environment, I plan to break the spaces down by territories and zones with adequate square footage for each intended use, and to make the spaces customizable and flexible so that it can be modified for various future functions.

**Lifestyle Brands**

**Layer of Luxury**

**Modern Luxury**

**Customization**

**Convenience**

**Main Points of Research**

- Reflect the way they live now—and, better, the way they aspire to live
- Comfortable, casual, and usable lobbies
- Smaller room sizes to encourage people to go into the public spaces
- Design, convenience, and flexibility
- Furniture arrangements that offer zones

The parameters for the redesign include the entire first floor of this four-story building. This space is approximately 15,500 square feet, with an additional 3,000 square foot pool and exercise area located in the rear of the facility.

Similar to the zoning layout and design of cruise ships, the rooms in this hotel may be smaller in order to draw more guests away from seclusion and into the public sectors.

Also similar to cruise ships, the finishes and atmosphere of the hotel will attempt to incorporate liveliness and community. An open feel between most areas will allow for guests to view the activities going on at all times and to see the different areas available to them. By keeping the larger part of the first floor visible, guests of the hotel will be drawn to the various activities and amenities.
