

## **ABSTRACT**

**THESIS:** Nursing Home Admissions: An Analysis of Secondary Data

**STUDENT:** Stephane Lewis-White

**COLLEGE:** Applied Sciences and Technology

**DATE:** December, 2011

**PAGES:** 56

Using an analysis of secondary data from the Health and Retirement Survey, this thesis provides the groundwork for understanding factors for nursing home placement using matching techniques to understand the differences between those persons with similar health characteristics who are not residents of nursing homes, and who are temporary residents or permanent residents of nursing homes.
