**CREATIVE PROJECT:** True Valor: A study of the future of technology through gaming

**STUDENT:** Lamar Clark-Gainous

**DEGREE:** Master of Arts

**COLLEGE:** Communication, Information and Media

**DATE:** December, 2012

**PAGES:** 15

*True Valor: A study of the future of technology through gaming* combines video production and game research as a metaphor for the future of technology. The project culminated with the production of a short video, made to serve as a futuristic vision virtual reality video games. The research within this project, covered a history of video games, particularly first person shooters, which relates back to the video since it is in first person form. The goal is to show that the future of technology is not only in the possibilities of what it can do, but also who can use it.
