Abstract

The purpose of this thesis is to determine if the type of sorority housing proposed through the development of The Greek Village Project will meet the needs of the Kappa Kappa Chapter of Alpha Omicron Pi at Ball State University. It was concluded that the townhomes, which will house twenty-six members as well as a meeting space that can accommodate one hundred and thirty individuals, will meet the needs of the continually expanding chapter. This conclusion was formed only after examining the varying classifications of sorority housing utilized by Greek organizations across the nation, reviewing the proposed Greek Village Project in its entirety, and analyzing the membership totals over the past four academic years for five of the AOII chapters located at universities within Indiana.

Acknowledgements

I would like to take a moment to show my gratitude to my thesis advisor, Jennifer Pierce. Her assistance was invaluable throughout the duration of this daunting task. I would also like to thank Jennifer Jones-Hall for taking time out of her busy schedule to meet with me and provide an abundance of information concerning The Greek Village Project. Lastly, this thesis would not have been possible without the material and data provided by Woody Ratterman, Andrea Theobald, and Barb Zipperian of Alpha Omicron Pi International Headquarters.
