Simple Staff Scheduler 2 (SSS2)

SSS2 Installation Information

1. Download the “Simple Staff Scheduler 2 MM-DD-YY.zip” file from Cardinal Scholar or another online source.
2. Download the User’s Guide from Cardinal Scholar.
3. Extract the program folder and files from the ZIP file. Designate a folder on the Desktop or in another location in your Windows user profile (Anywhere will work except the C:\Program Files\ folder.) A new folder named “Simple Staff Scheduler 2 Distro” will be created in the designated location.
4. Start the program by double clicking the “Simple Staff Scheduler 2.exe” file in the new folder.

Suggestion

Create a shortcut to the executable in the program folder on the desktop for easy access to the program.

Important Note

The SSS2 application must run from the folder that contains the supporting files. It will not operate properly if the executable is in a separate location from the WPFToolkit.dll, Staff.default, and other support files.
